Re: Lead Hazard Evaluations and Testing Services

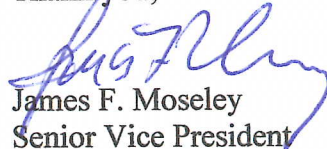

To Whom It May Concern:

PBO3 Environmental has performed lead base paint evaluations and asbestos reviews on rehabilitation and replacement of houses for us in multiple jurisdictions including Alachua County, Desoto County, Citrus County, Hernando County, Monroe County and the City of High Springs. Their projects have been delivered on time and within budget.

We have no problem in recommending their inclusion in your rehabilitation program.

If you need further assistance, please call my office at (866) 484-1975 (Toll Free).

Thank you,

James F. Moseley  
Senior Vice President
